

KYLE VINCENT MANUEL

Software Developer

kylevincentmanuel@gmail.com | 0918-529-9893 | Banga 2nd, Plaridel, Bulacan

SUMMARY

I am a determined individual and consistently committed to achieve goals and objectives. Aims to strengthen passion in coding and gain work experiences to the fast-developing world of computer technology.

WORK EXPERIENCE

Software Developer
Microsource Inc.

June 2024 – Present

- Built a responsive website using Remix, React, Shadcn and Tailwind CSS, delivering an accessible and user-friendly interface that improved overall usability and performance.
- Developed a comprehensive HRIS system using Remix, TypeScript, Prisma, and PostgreSQL, automating HR workflows, reducing manual processes, and improving operational efficiency across HR functions.
- Maintained and enhanced an enterprise web application using .NET, Entity Framework Core, and SQL on the backend, with React and TypeScript on the frontend, ensuring system stability and improving performance.
- Maintained ETL processes using .NET and Snowflake, and provided application support for WhereScape (DEV) ETL workflows, ensuring data accuracy and reliable warehouse operations
- Collaborated in Agile development teams, participating in, daily stand-ups, and retrospectives to ensure timely delivery of features.

Internship, Systems Support
PhilHealth Region 3-B

June – August 2023

- Monitored the PhilHealth administrator website for client requests from employers and members, managed inter-branch communications, and assisted administrative and technical staff with issue resolution and troubleshooting.

EDUCATION

Bulacan State University – Meneses Campus
Bachelor of Science in Computer Engineer

2020 – 2024

ACADEMIC PROJECT

TodaHero Ride-Hailing Application
A ride-hailing application solely for tricycle drivers

- Developed a mobile application with React Native and Node.js, leveraging Firebase for user data management, Expo Go for testing and emulation, and deployed on a Raspberry Pi for kiosk use

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, TypeScript, JavaScript, React, Remix, React Native, Node.js
- **Backend & Databases:** .NET, Entity Framework Core, Prisma, SQL Server, PostgreSQL, Firebase, Snowflake
- **Tools & Practices:** Git, GitHub, Figma, Azure DevOps, WhereScape, Agile, Expo Go, Raspberry Pi
